# Credible Business Intelligence

# 6.1 Updates

**Enhancements**

When setting up linked filters on dashboard reports, you can now show existing filters separately from other fields.

You can now use delivery rules with FTP broadcasts.

**Resolved Issues**

Prefixes and suffixes on multi-pie chart labels

Yearly comparison when the dates were formatted to show year

Secondary axis titles on combined category plots

Inability to change the entry style for a filter in a freehand SQL report

Errors populating filters using custom queries on freehand SQL reports

Minimize filter setting was not being saved

Error retrieving values for prompt filters on sub queries

Javascript error in Internet Explorer 8 when editing a conditional formatting advanced rule

Report deletion did not always delete the broadcasts using that report

Issue with distributing dashboards
