Subject: Next Complimentary Clinical Reporting Webinar Series - Wednesday, August 9

CREDIBLE

Behavioral Health Software

Clinical Reporting Webinar Series

DEAR PARTNER,

Credible is committed to assisting our Partners in preparing for federal initiatives, regulatory changes, and industry mandates. In the spirit of Partnership, Credible began offering a series of complimentary webinars in May focused on clinical reporting in support of industry mandates.

Led by a Credible expert, this series focuses on clinical measures and reporting for such programs as Meaningful Use (MU), Merit-Based Incentive Payment System (MIPS), and Certified Community Behavioral Health Clinics (CCBHC). Each information session is designed as both user training and as an interactive participant discussion.

Through September, Credible will be offering a biweekly series covering the following topics.

Please note: The schedule has changed from previous listings.

Date	Topic
August 9	CQM 161: Adult Major Depressive Disorder (MDD): Suicide Risk Assessment CQM 177: Child and Adolescent Major Depressive Disorder (MDD): Suicide Risk Assessment
TBD	CQM 50: Closing the Referral Loop: Receipt of Specialist Report

Registration for each session will be confirmed prior to the training. Sessions will last 60-90 minutes and will be scheduled during the lunch hour to promote maximum attendance.

The next complimentary **Clinical Reporting** webinar will review two similar CQM measures: **CQM 161: Adult Major Depressive Disorder (MDD): Suicide Risk Assessment** and **CQM 177: Child and Adolescent Major Depressive Disorder (MDD): Suicide Risk Assessment**. This webinar is scheduled for **Wednesday, August 9, at 12:00pm EST**.

This interactive session includes a deep-dive into the measure architecture; associated value sets as well as data collection points will be reviewed for these two similar Clinical Quality Measures. Understanding how these CQMs can be used as a tool to help measure and track the quality of health care services will be the basis of this discussion. Utilizing tools available in Credible, the focus of this session will be based on the measure foundations of “[clients with a] diagnosis of major depressive disorder with an assessment for suicide risk completed”. Using workflows, tools, and resources for this CQM — not only to track via data points, but also to expand and measure or quantify healthcare processes and outcomes — will be the overarching theme for this interactive webinar.
