Subject: Next Complimentary Clinical Reporting Webinar Series - Wednesday, July 26

CREDIBLE

Behavioral Health Software

Clinical Reporting Webinar Series

DEAR CREDIBLE,

Credible is committed to assisting our Partners in preparing for federal initiatives, regulatory changes, and industry mandates. In the spirit of Partnership, Credible began offering a series of complimentary webinars in May focused on clinical reporting in support of industry mandates.

Led by a Credible expert, this series focuses on clinical measures and reporting for such programs as Meaningful Use (MU), Merit-Based Incentive Payment System (MIPS), and Certified Community Behavioral Health Clinics (CCBHC). Each information session is designed as both user training and as an interactive participant discussion.

Through September, Credible will be offering a biweekly series covering the following topics.

Please note: The schedule has changed from previous listings.

Date	Topic
	<i>part 2 of a 2 part series</i>
July 26	MU Objective 8: Patient Electronic Access MU Objective 9: Secure Electronic Messaging
August 9	CQM 161: Adult Major Depressive Disorder (MDD): Suicide Risk Assessment

	CQM 177: Child and Adolescent Major Depressive Disorder (MDD): Suicide Risk Assessment
TBD	CQM 50: Closing the Referral Loop: Receipt of Specialist Report
TBD	MU Objective 5: Health Information Exchange

Registration for each session will be confirmed prior to the training. Sessions will last 60-90 minutes and will be scheduled during the lunch hour to promote maximum attendance.

The next complimentary **Clinical Reporting** webinar is the second half of a two-part series on the connected MU and MIPS measures: **MU Objective 8: Patient Electronic Access and MU Objective 9: Secure Electronic Messaging**. This webinar is scheduled for **Wednesday, July 26, at 12:00pm EST**.

This interactive session will review the measures covered in part one (*MU 2: Clinical Support and MU 6: Patient-Specific Education*), and build upon the flow of proven action to client action. It also includes a deep-dive into the measure architecture; associated value sets, as well as data collection points, will be reviewed for these measures. The base of this training is understanding the use of *Patient Electronic Access* and the *Credible Client Portal*, and how they flow into *Secure Electronic Messaging*. We will focus on using tools available in Credible for this measure, as well as workflows, tools, and resources for these joined measures.
