# CREDIBLE

Behavioral Health Software

## Clinical Webinar Series

DEAR CREDIBLE,

Building on 2017's successful Clinical Webinar series, and in the spirit of ever-evolving Partnership, Credible is happy to continue the webinars for 2018.

For those of you who are new to this series, these complimentary webinars are designed to assist our Partners in preparing for regulatory changes, industry mandates, and federal initiatives. The webinars provide updates on Credible Best Practices for clinical and administrative workflows, and other topics of vital importance to your Agency.

Led by Credible experts, this series will educate your staff and provide you with fresh perspectives and opportunities to improve efficiency in your organization, as well as get you ready for what's ahead. Mark your calendars for these upcoming events!

Registration for each session will be confirmed prior to the training. Most sessions will last 60-90 minutes and will be scheduled during the lunch hour to promote maximum attendance.

**Clinical Webinar: Credible Best Practices Diagnostic Assessment**  
**May 15, 12:00pm EDT — Presenter: David Rosswog, Ph.D.**

In this interactive session you will learn the intricacies of configuring and utilizing the Diagnostic Assessment feature in Credible. This session provides a deep dive into all the various Partner

Configuration settings, Security Matrix settings, and best practice workflows. The session will also cover how to develop or update the diagnostic assessment from the Client navbar or webform.

**Clinical Webinar: Managing Your Clinical Quality Measures — From Measure Architecture to Performance Based Results**

**May 17, 12:00pm EDT — Presenter: Holly Carman**

During this interactive session the focus will be utilizing a multi-step process to plunge into managing the components of a Clinical Quality Measure. The session begins with a careful overview based in measure architecture and progresses through to monitoring performance-based results. Learn how to consolidate the resources available, understand the components of the measures, and implement your own measure development life cycle model focused on workflow success.
