Subject: Complimentary Advanced Security Module for Credible Partners!

Complimentary Advanced Security Module for Credible Partners!

DEAR PARTNER,

The security of your clients' information – as well as your Agency's proprietary data – is of paramount importance to Credible. This is why for a limited time, **Credible is making its Advanced Security features available to all Partners free of charge – a value of over \$15,000!**

If you are not yet familiar with Credible's Advanced Security module, it offers two methods for enhancing your Agency's security: *IP Whitelisting*, and *Two-Factor (User) Authentication*.

- **IP Whitelisting** allows you to block all login attempts other than those coming from a pre-determined range of network IP addresses, such as your office. Individual users can be exempted from this restriction, if necessary for their role, allowing them to log in from any location.
- **Two-Factor (User) Authentication** restricts access to your Domain to users who have been verified via their email address or mobile phone number. Once this feature has been

activated, users attempting to log in to Credible will be required to verify their identity by entering a special code which has been sent to their mobile phone or email address.

*Please note: The Advanced Security Module must be activated for your Domain by Credible staff before these features become available. For more information on this module, please visit **Credible Help** under **Advanced Security**.*

To begin taking advantage of the benefits of this **complimentary Advanced Security** module valued at **over \$15,000**, contact your Partner Relationship Manager or Implementation Manager today!

Thank you for your continued Partnership,

Jaclyn O'Donnell

Executive Vice President
