# CREDIBLE

Behavioral Health Software

DEAR CREDIBLE,

Providing our clients with accurate, up-to-date information about their treatment is an essential component of our mission. In our continuing drive to improve the quality of care, Credible now supports integration with Meducation® from First Databank.

Meducation — a Credible Premium module — enables one-click, context-sensitive access to medication information and instructions via text summaries and short videos. This information is available to your Agency staff across Credible, including the medication pages, orders module, and the discharge summary. Also, clients using the Credible Client Portal can be granted access to documents and videos centered on their own medications and clinical support documents.

Included with Meducation is the Medication Calendar. By clicking the new calendar icon on medication and orders pages (or the Client Portal), an intuitive, easy-to-understand view of the client's current medications is shown, including dosage instructions. This helps clients keep to their medication schedule. The calendar can be printed directly, or included in the discharge summary.

The Meducation documents can be customized with your Agency's logo and addresses based on the specific Location or Geo Area, or left to the Agency's chosen default. Further, they can

be customized to meet the client's needs and preferences. Materials can be presented in 24 different languages, and at the font size best suited to the client.

For information about adding Meducation integration to your Agency's Credible Domain, please contact your Partner Relationship Manager.

*Meducation® is a registered trademark of First Databank, Inc.*

We thank you for your continued Partnership,

**Jaclyn O'Donnell**

*Executive Vice President*
