# CREDIBLE

Behavioral Health Software

## NEW FUNCTIONALITY TRAINING

DEAR CREDIBLE,

Based on the September Tasks and Enhancements release, Credible has created a two-hour training to review and demonstrate how to utilize recently released functionality.

The September release includes many new Partner-requested features and enhancements:

- **Orders 2.0 Release:** September sees the initial release of Credible's updated clinical module. Orders 2.0 was designed based on Partner feedback and needs, with easily sorted grids, drag-and-drop filters, Agency-defined order types, and more.
- **Titration Medication Schedules:** In eMAR 2.0, medications can be prescribed in gradually increasing or decreasing dosages, and the system will create the administration schedule for you. The Recurrence Type of Titration will add schedule entries for each step required to reach the proper dosage.
- **eMAR Billable Visits:** Agencies can create billable visit types tied to eMAR Administrations, greatly accelerating the billing process.

- **Forms and Signatures in eMAR:** Forms can be tied to eMAR Administrations, allowing for the collection of custom data (e.g., pain levels, vital signs), as well as capturing client signatures.
- **Self-Serve Visit Check In:** Using Client Portal 2.0, clients can now check in from their mobile devices, computers, or at a kiosk in the Agency, expediting intake workflows. When clients check in, they'll also be reminded of any associated forms they still need to complete, improving efficiency.
- **eMAR Schedule Printing:** Staff can now print eMAR schedules based on the assigned employee, or by the client.

Join Credible on **Tuesday, September 26th from 2:00pm to 4:00pm EDT** for our new functionality training on Orders, eMAR, and Client Portal.
