**Dear Jaclyn -**

Credible is excited to invite you to participate in our **Summer 2016 Business Intelligence (BI) Training** being held **July**

**26-28, 2016** at the **Gaithersburg Marriott Washingtonian Center** in Gaithersburg, MD. The focus of this summer's training will be our **newest version of Credible BI - the Yellowfin 7.1 platform!**

In order to maximize your Agency's use of the new upgrade, Credible highly recommends that all frequent BI users attend the training this July. We will discuss the new concepts introduced in 7.1, as well as providing tips and best practices for their use. [Click here for a full list of exciting enhancements and improvements.](#)

Some highlights of the new Yellowfin 7.1 Platform:

- Base Layers support faster content creation, enabling you to quickly and easily switch between different map types, while removing the need to write multiple reports when creating multilayered maps.
- Use powerful geographical data to create insightful location-based reports.
- New charting functionality supports better, faster, and deeper visual analysis with a broader range of Auto Charts, including multi-scatter, time-series, and trellis.

Credible's Business Intelligence (BI) Training is designed to support multiple user experience levels, and covers basic utilization, configuration, and security of this valuable graphical reporting tool.
