Subject: Credible Partner Webinar – Using Credible's Business Intelligence Module to Improve Process Compliance

CREDIBLE

Behavioral Health Software

DEAR CREDIBLE,

Back by popular demand!

One of the most highly rated 2018 Partner Conference sessions, "Using Credible's Business Intelligence Module to Improve Process Compliance," will be the next session presented on our monthly Partner led webinar series.

Join your colleague and presenter, Bob Shueey, on **Thursday, May 24th from 3:30pm - 4:30pm EDT** for an information packed session where attendees will learn valuable takeaways that can be immediately implemented at your organization. If you are considering using Credible's Business Intelligence module, this can't miss session will provide insight into the true return on investment your organization can realize.

Process compliance can be tough to monitor and enforce. Monthly or quarterly audit processes can identify problems, but often it's either time consuming or downright impossible to go back and fix the issues you discover because by the time you audit, it's too late. Is there a better way than the old never-ending train, audit, and re-train cycle? Yes!

In this session, you'll learn about the BI dashboards one Partner uses to provide real-time data to employees, letting them know what needs to be done now, what's overdue, and what's been done incorrectly - and before it's too late to do it right. Also shown will be a compliance dashboard to monitor and correct issues in the moment instead of at the end of the month or quarter. This presentation will provide ideas and a model that you can take back to your Agency and adapt to the processes and issues you face in your own operations.
